August 8, 2014

Dear Shareholders

The first half of 2014 is history, and the results were good. Net Income for the first quarter of 2014 was up 12.7% over the first quarter of 2013. For the second quarter, Net Income increased 15.3% over the same period in 2013. As I mentioned in the Press Release (a copy of which is attached for your review), loan volume was up 18% and we are finally able to reinvest maturing securities at higher rates.

SECURITIES PORTFOLIO

In looking back, I don't think I have ever spent any time with you discussing our investment philosophy. I should have, because securities make up 30-40% of our earnings assets. So here is a summary of our thinking on investments.

First, they have to be safe. Then, we have to be able to earn a decent return. The investment options for most banks consist of U.S. Treasury securities, Federal Agency securities (FNMA, FHLB, FHLMC, etc), corporate bonds issued by major companies (not a lot of banks invest in this area), and tax-exempt securities issued by states, municipalities, and school districts.

The hierarchy has always been that Treasuries are the safest, followed by Agency securities, then corporate bonds and tax-exempt securities. Theoretically, Treasuries and Agencies all have about the same level of risk. Risk in corporate and tax-exempt bonds varies widely, and purchase of these securities involves careful risk analysis.

As you would expect, the investment return is lower for the safest and goes up for the other types of investments. From the inception of Trinity Bank in 2003 until 2007 our investment portfolio consisted of a few Treasuries and lots of Agencies.

Parenthetically, let me add here that I have been a commercial lender my whole career. The first thirty plus years of my career, I spent hustling deposits to fund the loans I had made previously. However, as I have told you in numerous shareholder letters over the years, since we opened Trinity we have struggled to generate sufficient loan volume. Therefore, I have been forced to rely more on the investment portfolio to generate returns on your investment. Sometimes, I felt like I was running a leveraged bond fund instead of a bank, and I had neither the training nor the experience. With the recent increase in economic activity and loan demand, hopefully we will see less reliance on the investment portfolio to produce returns.

Now, back to the investment portfolio. In 2007, it appeared to my simple self that the Treasuries and Federal Agencies were not as strong as they appeared to most investment professionals. Therefore, we sold all of these investments and began purchasing corporate bonds and tax-exempt municipal securities. We do a pre-purchase analysis on all of these securities. We do not rely on the rating agencies such as Moody's or Standard & Poor's. The returns on these investments were higher than on Treasuries and Agencies, and I felt they were safer. (Most investment bankers and brokerage firms will tell you that Mr. Harp doesn't know what he is talking about – Treasuries and Agencies are backed by the full faith and credit of the U.S. Government. I don't have enough faith. I try to think for myself, and I'm a shareholder just like you.)

This philosophy – corporate and tax-exempt investments instead of Treasuries and Agencies – worked fine for several years. After five years of artificially suppressed interest rates (by the actions of the Federal Reserve), the investment world turned to investing more and more in corporate bonds. The spread between what a Treasury /Agency would pay and what a corporate bond earned became less and less. At the same time, the returns on tax-exempt securities remained attractive.

So we began selling the corporate securities and reinvesting in the tax-exempt sector. In the last few years, we have sold all of the corporate securities – the last group being sold in May of this year. I have repeated a chart from page 8 of the press release with some numbers highlighted. For the first half of 2013, Trinity had an average of \$24,115,000 in investment securities (corporate bonds) earning 3.20%. For the First half of 2014, the average investment in corporate bonds was down to \$4,562,000 (and the last of those sold in May 2014). The proceeds of those sales were reinvested in tax-free securities (earning 3.44% tax-equivalent) and in loans.

YIELD ANALYSIS	3 Months Ending							
	June 30, 2014				June 30, 2013			
	Average Balance	Interest	Yield	T/E Yield	Average Balance	Interest	Yield	T/E Yield
Interest Earning Assets:								
Short term investment	\$ 12,010	18	0.60%	0.60%	\$ 15,843	21	0.53%	0.53%
Investment securities	4,562	41	3.59%	3.59%	24,115	193	3.20%	3.20%
Tax Free securities	54,846	327	2.38%	3.44%	42,264	209	1.98%	2.85%
Loans	107,290	1,372	5.12%	5.12%	91,227	1,160	5.09%	5.09%
Total Interest Earning Assets	178,708	1,758	3.93%	4.26%	173,449	1,583	3.65%	3.86%

The implications are as follows;

- 1) we have sold all of the corporate securities over the last several years and have booked a gain over our cost basis of \$1,366,000;
- 2) we used this gain to replenish our Loan Loss Reserve and contribute to making our budgeted net income in 2012 and 2013;
- 3) the investment in tax-exempt securities has increased our returns and lowered our tax rate and increased the quality (safety) of our portfolio; and
- 4) having sold all the corporate bonds, gains on sale of securities will be minimal in future years.

Today, 100% of our investment portfolio consists of tax-exempt securities. This has increased our income through a lower tax rate. About 80% of those securities are issued by Texas school districts and guaranteed by the Permanent School Fund. They are rightfully rated AAA for safety (the highest rating available). The other 20% are issued by the State of Texas or by Texas counties and cities. For this last group, we do have a pre-purchase analysis program to ensure that we know the credit-worthiness of the issuer.

I apologize for the long-winded explanation, but this is an important topic, and I believe that the shareholders should know what we are doing and how we think. To repeat my earlier comment, we are in the business of lending money. But when we can't find loan volume with an acceptable risk/reward ratio, the excess funds go into our securities portfolio. You need to know our philosophy on investing.

To close this letter, let me give you a couple of firsts.

FORECLOSED REAL ESTATE

After 11 years, we have our first foreclosed real estate (shown as other Real Estate Owned). The one non-performing loan we had finally entered bankruptcy proceedings and we were able to foreclose on April 1, 2014. We wrote the value down to \$300,000 and expect (hope) to recover at least that amount this year.

STOCK PRICE

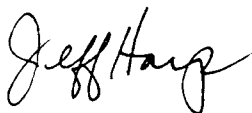

We finally had a stock trade at \$40.00 per share. My original goal was for the stock price to reach \$40.00 within 10 years from inception – May 2003. We missed it by a little over a year, but at least we are finally there and the return from the original price of \$10.00 per share is still pretty good considering the environment we have been through.

Going forward, you can do the math. If we can continue to earn at least 12% Return on Equity (14.36% in 2Q 2014) annually, then we should double again in 6 years. The attorneys and accountants will have heart failure over that last sentence. But I strongly believe that we owe you, the investor, a target and we ought to be held accountable for the results.

I apologize again if this has put you to sleep. I know most of you are not investment professionals and are not familiar with all of the fixed-income investment options. But, I want you to know how we go about attempting to produce a satisfactory return on your investment.

Thank you for your investment in and support of Trinity Bank. If you have any questions, suggestions, or topics that you would like for me to address, please contact me. I am available by email, phone, or in person.

Sincerely,

Jeffrey M. Harp
President

For Immediate Release

TRINITY BANK 2014 2ND QUARTER NET INCOME UP 15.3%

2ND QUARTER EARNINGS PER SHARE UP 16.4%

39TH CONSECUTIVE QUARTER OF PROFIT IMPROVEMENT

FORT WORTH, Texas, July 29, 2014 – Trinity Bank N.A. (OTC Bulletin Board: TYBT) today announced operating results for the second quarter and the six months ending June 30, 2014.

Results of Operation

For the second quarter 2014, Trinity Bank, N.A. reported Net Income after Taxes of \$807,000, an increase of 15.3% over second quarter 2013 earnings of \$700,000. Earnings per diluted common share for the second quarter 2014 amounted to \$0.71, an increase of 16.4% over second quarter 2013 results of \$0.61 per diluted common share.

For the first six months of 2014, Net Income after Taxes was \$1,578,000, an increase of 14.0% over the first half of 2013 results of \$1,384,000. Earnings per diluted common share for the first half of 2014 were \$1.39, an increase of 14.9% over the first half of 2013 results of \$1.21 per diluted common share.

President Jeffrey M. Harp stated, “Second quarter results were good due to:

- 1) Loan volume was up 18% - there is more economic activity so we are seeing some new opportunities plus more of our existing customers are experiencing increased demand.
- 2) Net Interest Margin increased from 3.63% for the second quarter of 2013 to 4.05% for the second quarter of 2014.
- 3) Core operating earnings (income before tax and loan loss provision) are up 17.5% over the second quarter of last year.
- 4) Operating expense control and asset quality remain excellent.
- 5) Return on Assets of 1.76% and Return on Equity of 14.36% represent new highs for Trinity Bank.

I think it is also noteworthy to report that Trinity’s Return on Equity of 14.36% is calculated based upon a Capital Ratio of 12.38%. There are banks that are earning a higher ROE, but few if any are doing it with 12% Capital.”

This Press Release may contain certain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 regarding future financial conditions, results of operations and the Bank's business operations. Such forward-looking statements involve risks, uncertainties and assumptions, including, but not limited to, monetary policy and general economic conditions in Texas and the greater Dallas-Fort Worth metropolitan area, the risks of changes in interest rates on the level and composition of deposits, loan demand and the values of loan collateral, securities and interest rate protection agreements, the actions of competitors and customers, the success of the Bank in implementing its strategic plan, the failure of the assumptions underlying the reserves for loan losses and the estimations of values of collateral and various financial assets and liabilities, that the costs of technological changes are more difficult or expensive than anticipated, the effects of regulatory restrictions imposed on banks generally, any changes in fiscal, monetary or regulatory policies and other uncertainties as discussed in the Bank's Registration Statement on Form SB-1 filed with the Office of the Comptroller of the Currency. Should one or more of these risks or uncertainties materialize, or should these underlying assumptions prove incorrect, actual outcomes may vary materially from outcomes expected or anticipated by the Bank. A forward-looking statement may include a statement of the assumptions or bases underlying the forward-looking statement. The Bank believes it has chosen these assumptions or bases in good faith and that they are reasonable. However, the Bank cautions you that assumptions or bases almost always vary from actual results, and the differences between assumptions or bases and actual results can be material. The Bank undertakes no obligation to publicly update or otherwise revise any forward-looking statements, whether as a result of new information, future events or otherwise, unless the securities laws require the Bank to do so.
